

Junior Full Stack Developer – AlarmMaster Pro

Location: Hull (Hessle) – 3 days in office, 2 days remote.

Employment Type: Full-Time

Salary: Competitive

About Us

At AlarmMaster Pro, we're revolutionizing how fire and security businesses manage their operations. Our cloud-based Field Service Management software is trusted by businesses across the UK, and we're expanding to bring even more innovative features to our customers.

We're looking for a passionate **Junior Full Stack Developer** to join our dynamic development team. If you're eager to grow, collaborate, and work with cutting-edge technologies, this is your chance to shine!

Your Role

As a Junior Full Stack Developer, you'll work on both front-end and back-end development to deliver exceptional software solutions. You'll play a key role in enhancing our product's functionality, performance, and user experience as we transition to modern web frameworks like React.

Key Responsibilities

- Develop, test, and maintain scalable and efficient software using .NET/C#, React, HTML, CSS, JavaScript, and TypeScript.
 - Build and consume RESTful APIs and GraphQL services for seamless application functionality.
 - Work on front-end interfaces and back-end systems, ensuring seamless integration.
 - Collaborate with senior developers to design and optimize cloud-based systems, leveraging Azure's full potential.
 - Contribute to the transition of our front-end to React while leveraging experience with similar frameworks (Angular, Vue, etc.).
-

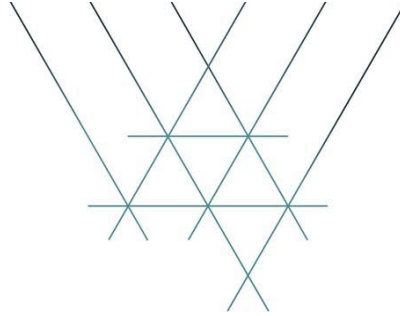

- Participate in continuous delivery pipelines, CI/CD processes, and DevOps practices to ensure smooth and reliable deployments.
- Utilize version control systems like Git to manage code effectively and collaborate with the team.

What We're Looking For

- **Qualifications:** Bachelor's degree in Computer Science, Engineering, or a related field—or equivalent work experience.
- **Technical Skills:** Experience with the following:
 - **.NET/C#** for software development.
 - **React** (or similar frameworks like Angular/Vue).
 - Front-end technologies: **HTML, CSS, JavaScript, TypeScript**.
 - Back-end technologies: **SQL, RESTful APIs, GraphQL**.
- **Development Experience:** Proficient in both front-end and back-end development.
- **Cloud Knowledge:** Familiarity with designing and architecting software for optimal cloud performance (Azure experience preferred).
- **Bonus Skills:** Experience with continuous delivery, CI/CD pipelines, and DevOps practices.

What We Offer

- A chance to work with a supportive team in a fast-paced, innovative environment.
- Professional growth opportunities with mentorship from senior developers.
- Hands-on experience with modern technologies and frameworks.
- Flexible working options (remote work or hybrid arrangements available).
- Competitive salary and benefits package.
